Our Approach

More than a manufacturer's representative, we are a solutions provider offering an integrated approach for all our clients.

Using a consultative style, we focus on our client's needs, providing the best product-independent power solutions for their unique facility requirements.

We function as a single source for all bid packaging, performance management, site coordination, operational issues, and testing.

We provide timely and efficient build-outs that meet all client requirements for the facilities.

We are aligned with vendors that are nationally and internationally recognized for power, reliability, quality and assurance.

We offer a single point of contact for: Scheduling and management of preventive maintenance activities, Facility-wide maintenance contracts, power quality audits, staffing and monitoring solutions.

We supply site-commissioning services in order to assure that the end users' systems are planned, designed, installed and tested for specification conformity and operational stability.
