

RECOVER THE REAL VALUE OF YOUR DATA CENTER ASSETS.

**NONE OF THE
RISK.
ALL OF THE
REWARD.
FOR EVERY
DATA CENTER.**

What makes us better?

**Data center expertise
that goes far beyond
the norm – lessening
your risk, lowering
your exposure, and
providing value where
you thought you had
none.**

In today's data center marketplace, consolidation and migration to colocation have created the need for qualified decommissioning and restoration experts. CPG can offset the cost of your restoration with the value of the infrastructure we remove and pass the savings on to you.

WE CAPTURE VALUE WHERE OTHERS CAN'T

We've helped the world's leading firms recover thousands of dollars in value from their assets – with a precision that's unique to the industry. For more than three decades we've been uncovering previously hidden opportunities to maximize the return of decommissioning projects - looking past the obvious to find value where others don't even think to look.

OUR EXPERTISE IS UNMATCHED

Our team of veteran asset recovery specialists are keenly focused on assuring the safe, efficient recovery of any equipment that has value. Our experience and expertise lets you be confident knowing that we've addressed all the risks that might otherwise undermine a successful decommissioning project.

EPA REQUIREMENTS

**HAZARDOUS WASTE
REMOVAL**

SECURITY

**PERMITTING
& ZONING**

INTERCONNECTED SYSTEMS

**TRANSPORTATION
& RECYCLING**

OUR PROCESS IS PRECISE AND PROVEN

Whether you need an old UPS unit removed, or an entire data center decommissioned, our precision process ensures your project is managed expertly, efficiently and with the utmost attention to safety and security. From pre-planning, permitting and staging to close-out and certification, we provide complete tracking and documentation of your entire project in order to limit liability, assure full compliance and deliver a flawlessly executed project.

Encore is one of the nation's leading providers of independent end-to-end data center solutions. For nearly 40 years, we've helped some of the largest and most influential brands in the data center business grow even stronger by solving their toughest design, construction and operational challenges.
